Q2. Read the passage and answer the questions given below: [15]

Mahatma Gandhi once had told 'Woman is the companion of man, gifted with equal mental capacity'. She has an equal right of freedom and liberty with man. 8th March is celebrated as the International Women's Day.

The Constitution of India ensures the dignity and honour for all women. The Chapter on the Directive Principles of State policy and the fundamental duties envisage the women empowerment. The Constitution of India also contains the special provisions for the women and children. In spite of these provisions, the women are governed by their personal laws.

The Conventions. Declarations of International Bodies like United Nations Organizations spell the dignity, honour and rights of the women universally.

In spite of these constitutional provisions, International declarations, conventions, covenants, conventions and laws and other allied laws, women still pass their time under the male domination. Thus in order to increase the quality of women, to avoid any discrimination and to safeguard the dignity, honour and equal status, the general awareness and implementation and enforcement of the legal provisions and the social responsibility aspects should be considered at the equality mandate and equal scale.

Questions:

- a) What did Mahatma Gandhi once say about a woman?
- b) Complete the following sentences:
 - i) The Constitution of India ensures that -----.
 - ii) Women are still under male dominion inspite of these provisions like -----.

 - c)** Juvenile Delinquency.

- Q.5** Write a precise and suggest a title: [15]

The cinema is an outstanding wonder of the modern age. It is not only a means of entertainment, but it is also in many ways an education in itself.

The cinema is a very valuable teaching aid. Historical films help the teacher of History. A couple of hours spent in the company of historical characters dressed in the costumes of the period can teach us far more than we can learn from a whole week's study of a history book.

Science can be taught very effectively through films. There are educational film companies which devote their time to the filming of the habits and customs of animals, insects, fish, germs, and numerous other branches of scientific life. We can see the hatching of the eggs of fish and their gradual development into large fish, we can watch the increasing activity of many kinds of germs and their effect on water, milk or blood. We can watch the opening and closing of flowers and leaves, and the growth of grass and weeds. All these actions and movements are greatly magnified on the screen. Such pictures are intensely interesting and are a very great help in the cause of education.
