- e) Yesterday, Shweta completed 300 units of work at the rate of 15 units per minute. Today she completed the same unit of work but her speed was 40% faster than yesterday. What is the approximate difference in the time she took to complete the work yesterday and the time she took today?

Q.2 Solve the following questions. **(10)**

- a) The average speed of a bus is 8 times the average speed of a bike. The bike covers a distance of 186 km in three hours. How much distance will the bus cover in 10 hours?
- b) What will be the compound interest obtained on a principal amount of Rs. 5500 at the rate 3% per annum after two years?
- c) The average speed of a bus is 67km per hour. The bus was scheduled to start at 12 pm. It was scheduled to reach a destination 335 km away from its starting point at 7 pm and a halt was scheduled on the way. For how long was the halt scheduled?
- d) A train crossed a platform in 36 seconds. The length of the train is 160 meter. What is the length of the platform?
- e) In an examination it is required to get 36% marks to pass. A candidate secured 400 marks and failed by 32 marks. What are the maximum marks of the examination?

Q.3 (Q. No. A to E) In each question below are three statements followed by two conclusions numbered I and II. You have to take the three given statements to be true even if they seem to be at variance from commonly known facts and then decide which of the given conclusions logically follows from the three statements disregarding commonly known facts. **(10)**

Give answers:

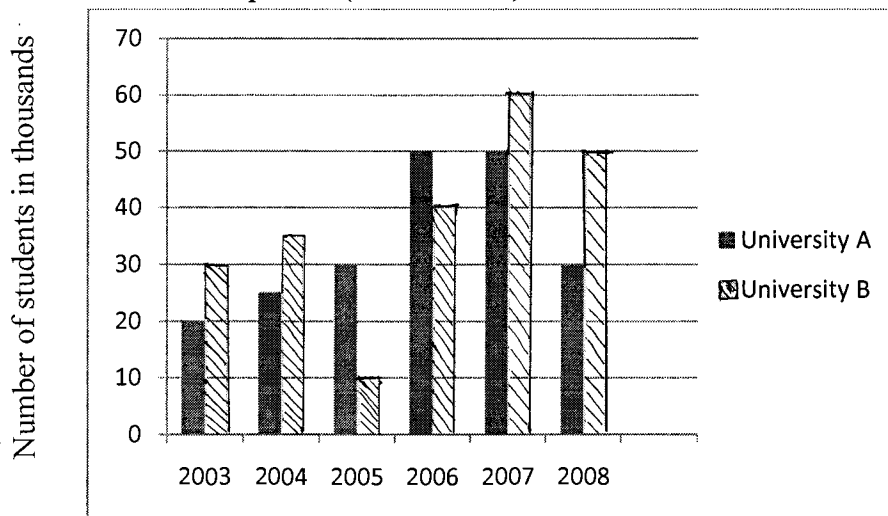

- I) If only conclusion I follows
- II) If only conclusion II follows
- III) If either conclusion I or conclusion II follows
- IV) If neither conclusion I nor conclusion II follows
- V) If both conclusion I and conclusion II follow

P. T. O.

- a) Statements : Some choices are mistakes
 All mistakes are error
 No error is justified
 Conclusions: I) Some Choices are justified
 II) All mistakes are not justified
- b) Statements : All bicycles are buses
 Some buses are cars
 All cars are carts
 Conclusions: I) Some carts are cars
 II) Some bicycles are cars
- c) Statements : All big are short
 Some short are long
 Some long are thin
 Conclusions: I) Some short are thin
 II) Some thin are not long
- d) Statements : All rewards are achievements
 All achievements are successes
 All successes are everlasting
 Conclusions: I) All successes are achievements
 II) Some everlasting are not successes
- e) Statements : Some rivals are enemies
 No enemy is a friend
 Some friends are strangers
 Conclusions: I) Some rivals are not friends
 II) All strangers are friends

Q. 4 (Q. No. A to E) Study the following graph carefully to answer the questions (10) that follows

Number of students passed (in thousands) from two universities over the years.

- a) What is the respective ratio between the number of students passed from University A in year 2007 and the number of students passed from University B in year 2004?
- b) What is the difference between the total number of students passed from both universities in year 2007 together and the total passed in year 2005 from both Universities together?
- c) What is the sum of students passed from University B in year 2003, 2005 and 2006 together?

- d) Number of students passed from University B in year 2008 is approximately what percentage of the total number of students passed from University A over the years?
- e) What is the respective ratio between the number of students passed in year 2007, 2008 and 2005 from University A?

Q. 5 Solve the following questions **(10)**

- a) In the following series one is wrong. Find out the wrong one:
 - i) 217, 216, 212, 203, 187, 151, 126
 - ii) 13, 16, 19, 23, 29, 31, 37
- b) If K denoted \times , B denotes \div , T denotes $-$ and M denotes $+$ then $40B8T6M3K4=?$
- c) Pointing to a girl, Mr. Suraj said, "she is the only daughter of my father's son in law." How is the girl related to Mr. Suraj?
- d) How many such digits are there in the number 37152869 each of which is as far away from the beginning of the number as when the digits are arranged in ascending order within the number?
- e) A number consist of two digits whose sum is 8. If 18 is subtracted from the number, the digits interchange their places. What is the number?

SECTION-II
(VERBAL ABILITY AND ENGLISH GRAMMAR)

Q.6 A) Do as directed **(10)**
