1. The cinema is an outstanding wonder of the modern age. It is not only a means of entertainment, but it is also in many ways an education in itself.

The cinema is a very valuable teaching aid. Historical films help the teacher of History. A couple of hours spent in the company of historical characters dressed in the costumes of the period can teach us far more than we can learn from a whole week's study of a history book.

Science can be taught very effectively through films. There are educational film companies which devote their time to the filming of the habits and customs of animals, insects, fish germs and numerous other branches of scientific life. We can watch the increasing activity of many kinds of germs and their effect on water, milk or blood. We can watch the opening and closing of flowers and leaves and the growth of grass and weeds. All these actions and movements are greatly magnified on the screen. Such pictures are intensely interesting and a very great help in the cause of education.

Child labour is a serious menace to the society and to our country which needs effective measures for eradication. In absence of fair work culture in India the employer's sole attention to the maintenance of machine and their production and due to strict compliance of statutory provisions often children are abused by way of child labour. No doubt, we have labour problems but it should not be sorted out at the cost of children's life. A child is a father of man. They deserve proper health, care education and upbringing so that they can unfold their potentialities and talents to give nation new horizons in future. Due to poverty and illiteracy the children and also their guardians are unconscious of their rights. The socio-economic status of child labour is far below the status of his employer.
