

CDOE
MASTER OF BUSINESS ADMINISTRATION (EXECUTIVE) (CBCS-2020 COURSE)
M.B.A. (E) SEM - I : WINTER :- 2021
SUBJECT: STATISTICAL TECHNIQUES

Day : Friday
Date 11/2/2022

W-23302-2021

Time : 10:00 AM-12:00 PM
Max. Marks: 50

N.B.

- 1) Attempt any **THREE** questions from Section I and attempt any **TWO** questions from Section II.
- 2) Both the Sections should be written in the **SAME** answer book.
- 3) Figures to the right indicate full marks
- 4) Use Graph paper if required. Use of **NON-PROGRAMMABLE** calculators is allowed

SECTION- I

- Q.1** The mean of the following frequency distribution was found to be 1.46. **(10)**

Number of accidents	Number of days
0	46
1	?
2	?
3	25
4	10
5	5
Total	200 days

Find the missing frequencies.

- Q.2** Asha, Beena and Chandani are given a problem to solve. The chances that they can solve the problem are $\frac{1}{3}$, $\frac{1}{2}$ and $\frac{1}{4}$ respectively. What is the probability that the problem will be solved? **(10)**
- Q.3** The following table indicates the data on the number of patients visiting a hospital daily for a period of time. **(10)**

Number of patients	0-10	10-20	20-30	30-40	40-50	50-60
Number of days	7	11	16	28	24	14

Compute the median and mode.

- Q.4** A survey is conducted to study the effectiveness of an advertisement by calling people at random by asking the number of advertisements read or seen in a week (X) and the number of items purchased (Y) in that week **(10)**

X	5	10	4	3	2	7	3	6
Y	10	12	5	2	1	3	4	8

Calculate the Karl Pearson's Coefficient of correlation and comment on the result.

- Q.5** Write short Notes (Any TWO) **(10)**

- a) Advantages of sampling
- b) Scatter diagrams
- c) Conditional probability
- d) Coefficient of Variation

SECTION- II

- Q.6** Marks scored by two students in 5 tests are as follows **(10)**

A	68	71	70	75	76
B	61	92	93	51	48

Find coefficient of variation to conclude

- a) Who is a better scorer?
- b) Who is more consistent? Why?

- Q.7** Given the two regression lines, $x - y - 5 = 0$ and $x + y - 4 = 0$ **(10)**

Find

- a) Mean for X and Y
- b) Using regression lines, Predict X when Y = 50

Q.8 The weekly wages of workers in a factory is distributed as follows. **(10)**

Wages (Rs.)	No. of employees
300-350	8
350-400	13
400-450	18
450-500	25
500-550	16
550-600	13
600-650	7

- a) Draw histogram.
- b) Determine the modal wage of the workers
